MISSION STATEMENT

HERE AT UNITED PACIFIC, we are dedicated to providing today's drivers with innovative and exciting products that deliver exceptional performance and value. Because United Pacific's continuing success depends on our customer's satisfaction, we constantly push our designers and engineers to upgrade our facilities and processes in order to bring products of superior quality and reliability to the market. We at United Pacific promise to continue our passionate pursuit to be the first in:

QUALITY, INNOVATION AND DESIGN.

QUALITY

With over 30 years of experience in the heavy duty trucking industry, United Pacific Industries understand the rigors and stresses that our products are subjected to on the road. It is our mission to provide our customers with products of superior quality and reliability. In achieving this goal, United Pacific only partners with manufacturing facilities that conforms to our quality control requirements and standards. Our manufacturing partners meet or exceed ISO-9001 requirements. In addition, United Pacific's manufacturing partners must be equipped on site to perform the following quality assurance tests:

- Aging Test
- Air Tight Test
- Dust Test
- Flux Test
- Photometric Test
- Pull Force Test
- Rain Test
- Salt Spray Test
- Shock Test
- Temperature Test
- Humidity Test
- Vibration Test

United Pacific's manufacturing partners must maintain a track record of consistent quality and low product failure rate. Furthermore, our internal quality control structure allows us to function as the final quality control station prior to shipping. With the assistance of 3D computer technology, United Pacific can adhere to strict quality control standards during prototype creation and the production process. Our engineers and technicians perform a battery of tests to ensure that our products meet the demands of today's drivers and our goal to be first in quality.

ABOUT US

DESIGN

Located near some of the nation's most progressive automotive design centers, United Pacific established the UP Design Studio in 2002 to consolidate our position as the design leader in the heavy duty trucking industry. UP Design Studio utilizes the latest generation of computer aided design (CAD) and studio/graphic software. The design studio is equipped with the newest computers and rapid prototyping systems. In addition, UP Design Studio is staffed by graduates from the nation's most prestigious design colleges.

Unlike our competitors, United Pacific's design and manufacturing capabilities mean that we carry more new and original items than our competitors. The establishment of the design studio will enable us to generate even more new products with significant shorter concept-to-shelf time. The reduction in development cost mean that we can develop products utilizing design based development processes. Design based product development allows United Pacific to create new product concepts based on designs incorporating driver demands and needs instead of economic considerations. United Pacific's emphasis on design distinguishes and positions us ahead of our competitors.

INNOVATION

Known as the leader in innovation, United Pacific is dedicated to be the first to bring new and exciting products to the market. United Pacific's global expertise allows us to search the globe for new ideas and concepts. Not only do we search the globe for new products, United Pacific invest a significant amount of resources into our own research and development efforts. With the assistance of advance 3D scanning technology, our engineers and designers can acquire accurate and precise data in seconds. The 3D data allows United Pacific to verify designs, perform quality assurance tests, and reverse engineer with unprecedented speed and accuracy. Digital inspection contributes to the early detection of shape problems, provides rapid feedback on design, and

eliminates unnecessary work in downstream processes. Our rapid prototyping facility permits us to have a concept-to-shelf time of less than 5 months. In addition, United Pacific's 3D printing capabilities permit our designers to have physical models of their design concepts in hours. The physical models allow our designers and marketing staff to evaluate and test the viability of different design ideas. Our rapid prototyping facility allow United Pacific to compress design cycles, improve manufacturing planning, shorten concept-to-shelf time, most importantly, generate new and innovative products.

HOW TO ORDER

To order from United Pacific Industries, you must be an authorized dealer, distributor or oem.

WARRANTY

With LED (Light Emitting Diodes) rated at 100,000 hours of operation and solid-state construction, United Pacific's LED lights are extremely reliable and durable. Purchase with confidence, United Pacific offers a complete line of LED lighting products with extended warranties. Please see the warranty policy page for more details.

INVENTORY & SHIPPING

United Pacific carries over 20,000 items in our California distribution center. No other company in the heavy duty trucking industry can match United Pacific in the variety and range of in-stock inventories. With an order fill rate of over 98.5%, United Pacific is the largest and most reliable supplier in the industry. Our shipping department ships 96.8% of all orders within 24 hours and 98.9% within 48 hours. United Pacific's vast inventory and prompt shipping has made United Pacific the only source for our customer's chrome and lighting needs.

ASSEMBLED IN U.S.A..

United Pacific strives to provide today's drivers with innovative and exciting products that deliver exceptional performance and value. With our international background and expertise, we search the globe for the best and most reliable products. However, as an American company, we believe and support the American way of life. Look for the "Assembled in the USA" label on many of our products. Although the components are manufactured overseas, the products, bearing the "Assembled in the USA" labels, are hand assembled with pride in the United States.

HARD AT WORK FOR THE ENVIRONMENT

United Pacific
132,000 sq ft

Distribution Center
Long Beach, CA

100% reduction in potable water used for landscaping

40% reduction in total energy use due to high-efficiency mechanical and lighting systems

82% of construction waste was diverted from landfills

LEED ACCOMPLISHMENTS

Sustainable Sites

- On-site bicycle storage, showers and changing areas for company employees
- Preferred parking for low-emitting, fuel-efficient and carpool vehicles
- Stormwater is infiltrated on-site and treated to remove contaminants to reduce environmental impact on local waterways

Water Efficiency

- In addition to using reclaimed water, drought-tolerant plants and a high-efficiency irrigation system were installed to reduce the use of potable water for irrigation by 100%
- High-efficiency water closets, lavatory faucets, and showers were used to reduce annual water use by 30%

Energy and Atmosphere

- Efficient HVAC equipment and a lighting system with daylight controls reduces energy consumption by over 30%
- Enhanced commission verifies that the building's energy and water-related systems are performing as intended by the initial design

Materials and Resources

- Over 81% of construction and demolition waste was diverted from landfills

Indoor Environmental Quality

- Building ventilation system was designed to provide enhanced levels of fresh outside air to building occupants
- Interior finishes (paints, sealants, adhesives, coatings, carpet systems and composite wood) were selected with low levels of volatile organic compounds (VOCs) to reduce indoor air contamination

20th

1994-2014

celebrating 20 years

- United Accessories started with a simple premise: To be the leading manufacturer in the BIG RIG chrome market by integrating innovative designs and processes.
- UA stocked 1,000 items and operated out of a 5,000 square foot warehouse in Gardena, CA.

2004

- United Accessories changed its name to United Pacific to reflect the company's emerging National and International presence.
- With over 8,000 items, United Pacific relocated to a larger facility in Carson, CA, to meet growing service and logistic needs.
- United Pacific introduced a revamped logo. Owner Operators embraced United Pacific as their brand of choice.

2014

- United Pacific distributes its products in 30 different countries through a network of over 2,000 distributors and dealers.
- Now offering over 20,000 items, United Pacific brand products continue to set the industry standard for QUALITY, INNOVATION and DESIGN.
- United Pacific opens a new state of the art distribution center in Long Beach, CA, to consolidate our operations and fulfill the needs of our dealers.

United Pacific sincerely appreciates the continued business from our dealers. We would not be...

FEATURED PRODUCTS

LED Light Bulbs

2 LED 1157 BULB

May's featured products are LED light bulbs. LED light bulbs consume less energy, can provide higher light output than traditional filament bulbs, and last a lifetime. Most of these bulbs are plug and play and require no modification. They come in a variety of colors for specific illumination purposes.

Upgrade the interior and exterior of your vehicle with United Pacific LED bulbs!

These 1157 bulbs have 2 high power OSRAM LEDs, using only 2 watts and create 250 lumen. It's double contact with offset pins. Available in amber, red, and white.
